U.S. Patent and Trademark Office PTOL-303 (Rev. 08-06)

Continuation of 11. does NOT place the application in condition for allowance because: While it is recognized that Dorn is not an optical waveguide in the sense of Zhang or the instant, it is well known in the art to make waveguides with multiple layers and Dorn teaches how to make multiple layers of electro-optic materials in the instant manner. The instant layers are really no different than those shown in Dorn-ie, they are sheets or films with similar dimensions. It is respectfully submitted that the motivation for combining the references would be found in the general state of the art.
